

Tactical Analysis
May 22nd – 26th, 2023
Appleton, WI

Course Instructor:

Christopher Bruce – Christopher Bruce is a trainer and consultant with expertise in police data systems, crime analysis, and data-driven strategies to reduce crime. He was a crime analyst for 18 years in Massachusetts, where he performed daily tactical, strategic, and administrative analysis for municipal police agencies. For the last 13 years, he has provided consulting and training through a variety of nonprofit associations and government agencies in the areas of data management, crime analysis, traffic analysis, hot spot policing, and problem-oriented policing. In 2019, after almost 20 years of adjunct teaching at various colleges, he became a full-time assistant professor of criminal justice at Husson University in Bangor, Maine.

Christopher served on the board of the International Association of Crime Analysts for nearly 20 years, including periods as vice president of administration (2000-2006), president (2007-2012), and vice president of membership (2016-2019). He was the first editor of the IACA's flagship publication, *Exploring Crime Analysis*. His other publications include *Spatial Statistics in Crime Analysis: Using CrimeStat III* (2013), *Better Policing with Microsoft Office* (2007), and *Building a Model Crime Analysis Program* (2017).

Tactical Crime Analysis is a five-day workshop that trains analysts in the techniques used to identify, analyze, and solve crime patterns and series.

Beginning with a review of relevant terms and concepts, this class covers the methods used to identify crime patterns as they emerge; the techniques used to analyze them for location, time, victim, offender, and modus operandi; considerations for disseminating information to police; and tactics for offender apprehension, suppression, and opportunity-blocking.

The class uses real examples, hands-on lessons, computer exercises, and a capstone project that will use a range of tactical analysis skills
