

Do you want to learn how to use Power Query & Power BI?

# POWER QUERY & POWER BI

Microsoft Power BI is a powerful application for data visualization and reporting that can handle millions of rows of data. Power Query is a data transformation and preparation engine that can help you clean and process data from any source, and then repeat those steps when you get updated data. The data can then be passed to other applications such as Microsoft Excel or Power BI.

This webinar series will walk you through using Power Query and Power BI using live demonstrations in the applications with open source crime data.

## Schedule-\$10 each for members

- **January 18th**-Intro to Power Query
- **February 15th**-Transforming data in Power Query
- **March 15th**-Cleaning data in Power Query
- **April 19th**-Combining data from multiple sources
- **May 17th**-Intro to Power Query M Formula Language
- **June 21st**-Intro to Power BI
- **July 19th**-Simple Visualizations in Power BI
- **August 16th**-Power BI Visualizations Cont'd
- **September 20th**-Mapping in Power BI
- **October 18th**-Temporal Analysis
- **November 15th**-Modeling
- **December 20th**-Introduction to the DAX

*Sign up for just the topics you're interested in, or the whole series! It's up to you which ones you take!*

**All sessions will be held at 1200 hrs Eastern Time**  
Delivered via GoToWebinar

All Power Series webinars will be recorded; if you cannot attend the live session, we will provide the recording the next day to those who register. Otherwise, the recordings will be posted to the webinar library after 45 days. All attendees will earn Continuing Education credits.
